

CSTI has used VeriFone transaction products since 1988. VeriFone is the global leader in electronic payment technologies delivering solutions to over 130 countries with sales projected to be in excess of \$1 Billion.

VeriFone spends over \$70 million in R&D investment annually which is more than its top three competitors combined.

Having been in business for over 30 years, VeriFone has earned a remarkable record in the electronic payments industry by delivering innovative, highly reliable payment system solutions.

When designing products, a key goal for VeriFone is to achieve the highest reliability and largest life possible. VeriFone products are designed with durable, proven components like rugged card readers, keypads, and secure, solid casings. All products are designed with a 100,000 hour MTBF goal.
